PROFILE

Aspiring Java developer with a solid grasp of core programming principles and hands-on experience in Java application development. Detail-oriented and dedicated to writing clean, efficient code. Eager to leverage academic knowledge and practical skills to tackle challenges in software development and grow professionally.

PROJECTS

Core Java

Developed custom algorithms to solve complex problems using arrays, enhancing overall application performance.

Credit Card Validator

Luhn Algorithm By Java and HTML, CSS and Javascript

Tamil Nadu Electricity Bill calculator

By Java and HTML, CSS and Javascript

SPRING BOOT Security with CRUD Operation

Developed a Spring Boot application implementing CRUD operations with role-based security authentication, using Thymeleaf for dynamic UI rendering. Integrated Spring Security for access control and validation across different user roles.

INTERNSHIP

Intern (API Testing)

Worked on API testing of CRUD operations using tokens provided by the intern operation. Utilized Postman for testing and verifying API endpoints

Intern (SAADIVSH Interior)

Styled and developed front-end components using HTML and CSS to meet client requirements. Ensured responsive and user-friendly design implementations.

Intern (RKB Real estate Project)

Worked in a team environment, contributing to group projects and collaborative efforts. Experienced in using GitHub for version control including pushing and pulling code changes.

CERTIFICATION

SCRUM FUNDAMENTAL CERTIFIED

Based on Agile Methodology

JAVA FULL STACK DEVELOPMENT

Payilagam institute Velachery Chennai
